

SOLO BLAST FOR AOL'S PRIVACY WALL OFFERING:

HEADLINE:

Are You SURE Your Identity, Financial or Health Information Is Being Protected From Hackers?

Be As Sure As Possible With AOL's New Privacy Wall.

COPY:

AOL has partnered with the National Cyber Security Alliance (NCSA) to study how secure computer users really are. The results? An alarming two-thirds of all computer users (67%) do not have ANY firewall protection at all. And half of broadband users do not have a firewall. Yet, they thought they were safe.

Be as SURE as you can be that your sensitive information (identity, financial or health) is not vulnerable to hackers and thieves.

- Get your [personal firewall](#)
- Place a barrier between hackers and your PC
- Help protect your personal, sensitive information online

[AOL Privacy Wall](#) – powered by McAfee, has been designed to be very easy to set up and easy to use. In just a few clicks, you can feel safer about your online security and worry less about online intruders.

Don't be vulnerable. Be as sure as you can that your computer is being protected. Click the arrow for a special **FREE** trial of this important new product from AOL.
