Subject: Insider Aerospace News You Won't Get on Wall Street

Fellow Investor,

There's a joke among some of my investment cronies:

Q: How do you make a quick \$500 million?

A: Invest \$1Billion in an airline.

But seriously, with the right business model, even an airline can turn a nice profit. Witness Southwest Airlines in the U.S. and Ryanair in Europe.

I've found another discount airline, which has been extremely profitable, since its inception in 2001.

In fact, it's the **MOST** profitable ever!

There are three things that describe this foreign company: Growth, efficiency and good investor relations.

Growth: This airline already offers over 440 daily flights to 49 major business and travel destinations throughout South America. And, with a 30% share of the country's domestic market, its system-wide passenger traffic increased 58% over the past 12 months.

With a targeted 20 million customers, it could easily triple its current size. Apparently, this is their intention, with a recent announcement of plans to expand their fleet from 40 to 105 planes between now and 2009.

Efficiency: The company's net margins for the 4th quarter of 2005 reached 20%. This is the highest operating margin for any airline in the world. (To put it in perspective, the U.S. airline's discount champion, Southwest, saw an operating margin of only 7%!)

This company saw a net profit up 33% in 2005. And what is their secret, you ask? It runs a simple operation, with a single class of service. And, it has one of the youngest and most modern fleets in the industry.

Translated ... efficiency. They're lean, mean flying machines.

Good Investor Relations: Very investor-friendly, and even winning awards. They're definitely a global investor relations champion.

Right now is a screaming buying opportunity. And, I'm recommending a buy and sell stop to all my subscribers.

You won't hear about these "secret" global bull markets on Wall Street or CNBC. Finding the right markets takes skill, experience and contacts built up over many years. That's what I offer.

You can get the name of this company, details on how to buy the stock and potentially explosive options I'm recommending. Just subscribe today at the link below.

Bull Markets Even Your Broker Doesn't Know About

In the last year, lucrative stock markets around the world skyrocketed 85.8%...102.2%...114.5%. During this same period, the U.S. stock market struggled to make single-digit gains.

Since launching this service in October, our subscribers have been raking in extraordinary profits. Take a look at these profits we've already enjoyed:

- * 89% in only 1 week
- * 128% in only 18 days
- * 125% in only 1 month
- * And 4 of our stock positions have short-term double digit gains

But don't expect to hear much about these global markets from your broker or CNBC. Finding the right markets takes skill, experience and contacts built up over many years.

These guys don't want to work that hard for you. Why should they when they can stay fat and happy, pushing the same tired stocks for the same tired returns.

Instead of getting mad, how'd you like to get very, very rich in these little-known markets -- easier and more quickly than you can imagine?

Everything you need to know is in a Special Report I've just written: "Conquer the World's Secret Stock Markets." For your free report, just go to:
